Skills Summary

🔗 Languages

- TypeScript
- Python
- Scala
- SQL
- Java
- Terraform

✂ Technologies

- GCP
- Kafka
- Airflow
- Node.js / Deno
- Spark
- GraphQL

Work Experience

Fey

September 2021 — April 2023

Senior Software Engineer

feyapp.com

- Fully designed and implemented the backend for the Research part of the app, which involved both streaming and batch data
- Reverse-engineered the Robinhood API to integrate trading and real-time syncing. This unlocked a huge pool of customers
- Enabled revenue by building user account subscriptions with the Stripe API
- Owned large parts of the app as part of a small remote startup, where shipping fast and being able to pivot is important

Hopper

November 2020 — August 2021

Senior Software Engineer - Travel Platform

hopper.com

- Led the GCP migration of high-traffic big data distributed systems, such as price forecasting and user tracking, with zero production downtime
- Slashed payment processing costs by up to 10% via smarter payment routing strategies

Hopper

August 2018 — November 2020

Software Engineer - Data Platform

- Democratized ETL across engineering and data science through reusable and performant data processing jobs (Spark, Bigtable, BigQuery)
- Drastically grew data-driven decision making by integrating realtime user events into Amplitude for self-serve analytics
- Improved data reliability by co-developing a type-safe, idempotent, and scalable tracking events system. Presented demos, documentation, and gathered feedback to increase adoption

Internships

NerdWallet

May 2017 — December 2017

Data Engineer Intern

nerdwallet.com

Symantec

September 2016 — December 2016

Software Engineer Intern

symantec.com

Public Safety Canada

January 2016 — April 2016

Software Engineer Intern

publicsafety.gc.ca

Evertz Microsystems

May 2015 — August 2015

Software Engineer Intern

evertz.com

Education

University of Waterloo

September 2014 — June 2018

🎓 Bachelor of Computer Science Co-op, Honours

uwaterloo.ca
